- 25X1
1. The building of a new cement factory in Dvur Kralove (Koeniginhof - 051/G73) is planned. Work is to start in September 1950 and is to be finished at the end of June 1951. Construction of buildings not considered essential was halted in June 1950 due to a lack of cement. The new furnaces in Radotin (050/L77) have been completed.
 2. A military installation at Nebusice (051/L78) in the vicinity of Prague, 300 m. behind the Jeneralka building and on the road from Jeneralka to Nebusice, has been completed and is being used. It is believed that this building, which was started in 1949, was originally planned for the Military Technical Institute but it is not known if these plans were carried out. Another building of underground design is being constructed near the new installation at Nebusice. However, work on the iron and concrete construction was stopped recently because of a change in plans. The building of an underground airfield at Klecan (Gross Klecan - 051/L79) is planned for 1950. New casernes for the SNB at Prague-Veleslavin (051/P78) with normal foundations and iron and concrete frames have been started. Recently, an order was issued to complete these buildings within six months.
 3. A four-story underground factory originally started by the Germans is being built in Blansko (P50/N42). Several shifts are employed in the construction work. Similar factories are to be built in the area south of the Krkonose mountains (Riesen Gebirge). Although the 1950 budget did not allot funds for this construction, large sums have been transferred to this project from other allocations. The order to finish the buildings as rapidly as possible allegedly came from the USSR.
